

YOUR ULTIMATE ON A BUDGET NO CREW BEGINNER VIDEO STUDIO QUICK SETUP

Logitech HD Pro Webcam C920, 1080p Widescreen Video Calling and Recording

The best part about this camera is that you can use it with or without a tripod. Also, you don't need SD cards since the camera records directly to your computer. It works with Windows, Mac, Chrome OS, and Android. There is automatic light correction and that helps in a low light situations. The two built-in mics capture stereo audio and filter the background noise. However I recommend buying the mic below for better audio quality. Later you can invest in a higher quality mic.

The camera costs under \$80. [Click here for more info.](#)

Movo PM10 Deluxe Lavalier Lapel Clip-on Omnidirectional Condenser Microphone for Apple iPhone, iPad, iPod Touch & Android Smartphones

If you are on a budget and just beginning to create video content this is the mic you need. It costs under \$20. You can use it with your phone. If you also think of vlogging with your smart phone this is a great piece of equipment to have. [Click here for more info.](#)

If you will be doing interviews, they have a similar option with two mics. [Click here for more info.](#)

Camtasia

After you record, Camtasia will import your system audio, screen video, cursor, and microphone onto their own tracks, so you can easily edit them.

If you also want to record your screen for tutorials, webinars or video programs Camtasia will record your screen. [Click here for more info.](#)

If you are on a Mac use ScreenFlow. [Click here for more info.](#)

If you are only going to edit and not screen record, then use iMovie that comes with the Mac.

Neewer 18" Dimmable 75W(600W equivalent) Continuous Camera Photo Video Ring Light Kit

This light saved me tons of headaches, time, and money. Using this eliminates the complicated three-point lighting which, if you are not experienced, will look amateurish. You save money and space because using this light eliminates the need for a tripod since the camera mounts directly inside the light ring. For under \$150 you will have professional looking videos and you will not spend time setting up equipment. [Click here for more info.](#)
